

## CURATIVA CANNABIS SELECTED TO RETAIL IN NORTH BATTLEFORD, SK

*Released on June 2, 2018*

We are proud to announce that Saskatchewan Liquor and Gaming Authority (SLGA) of the Government of Saskatchewan confirmed on June 1, 2018 that Curativa Cannabis, a division of Envirosafe Chemicals Canada, has been selected to retail cannabis in North Battleford, Saskatchewan, Canada.

Curativa Cannabis was the successful proponent from the selection process including an application and qualification screening by KPMG, then lottery draw, whereby Curativa Cannabis was awarded this prestigious retail opportunity.

“This represents the next step in the process of having a privately-operated cannabis retail system carefully regulated by SLGA,” Minister Responsible for SLGA Gene Makowsky said. “There was a lot of interest... resulting in new businesses that will invest in our province.”

“This is an exciting opportunity for Envirosafe Chemicals Canada as we prepare to diversify our business with Curativa Cannabis,” stated James Davey, President and Chief Executive Officer. “We are honoured to be part of the historical marijuana movement in Canada, and proud to bring cannabis retail business and opportunity to North Battleford, Saskatchewan.”

“Selection to retail cannabis is a significant success for Curativa Cannabis. This will provide a gateway to our potential expansion into marijuana growth and production,” Davey said, “forwarding the medicinal marijuana development with products that provide relief from unnecessary suffering and as an alternative to chemical means by offering a natural resource for healing.”

Curativa Cannabis’ permitting will not take effect until legalization occurs and must be operational within 12 months of legalization.

Although medicinal marijuana is our primary focus, we are poised to offer recreational products once legislation supports same.

In support of our retail model, we are in development of the Curativa Cannabis online store, where we will offer high-quality, clean cannabis products. Visit our website listed below for further details on our product selection coming soon.

## ABOUT US

Curativa Cannabis is a division of Envirosafe Chemicals Canada, a unique, environment conscious, bio-science company producing bio-degradable, non-toxic, non-hazardous, environmentally safe products to the industrial specialty chemical and retail markets. For over 25 years, we have been offering excellence to our customers with proven expertise in bio-science, biotechnology, environmental consultation and sustainable solutions. Our corporate headquarters and facility are located in North Battleford, Saskatchewan, Canada.

Curativa Cannabis is a diversification for Envirosafe Chemicals Canada, poised for success in the medical marijuana market, with:

- Significant research, development and knowledge base of marijuana, seed-to-patient.
- An active manufacturing and production facility, and additional adjacent property for expansion.
- Authorization for growth and production of medical marijuana in North Battleford including city zoning and unanimous approval from city council and all city emergency services.
- Completed application submitted to Health Canada for growth and production of cannabis (pending approval).

## VISION

Our goal is to cultivate and produce high-quality, clean cannabis products for medicinal use. We will provide commercial-scale cannabis with an unmatched level of environmental control, to develop, refine, and repeat specific growth conditions.

With historical industrial production experience, and significant knowledge of marijuana production, we aim to be a leader in the cannabis industry and evolve with the needs of our consumers. We will continue to offer excellence to our customers with proven expertise in bio-science, biotechnology, environmental consultation, sustainable solutions, providing conscious and clean products. When legislation in Canada legalizes recreational marijuana use, we will be prepared to expand into the same.

## COMMITMENT

We will produce a high-grade of cannabis that our consumer will feel comfortable to use, safe for human consumption and free of toxic additives. Curativa Cannabis will provide commercial-scale cannabis with an unmatched level of control, to develop, refine, and repeat specific growth conditions.

We assure the highest quality of cannabis production prior to market. Our impeccable sanitation processes will ensure production, packaging, labeling and storage activities involving cannabis are conducted under strictly controlled conditions. Quality control for products and substances in storage and standard operating procedures, conduct of recalls, complaint management and sample retention, reporting adverse reactions will be paramount by our experienced technical team to ensure compliance within each area and to Health Canada.

Curativa Cannabis aims to conduct the growth of marijuana from seed-to-patient whom access cannabis for medicinal purposes with approval of product prior to sale through analytical testing and validation methods.

We commit to produce superior cannabis, providing pharma-grade medical marijuana, mindful of our consumer patients needs with the utmost standards and care, while generating significant margins for our investors returns.
